Explanation of zoom function - Telesin Smartphone Diving Case with Buttons and Vacuum Pump

The zoom function on Android should work automatically.

The zoom function on iPhone must be activated separately. The instruction to do this can be found in the manual, but below is a brief summary in English (see screenshot):

1. Open the Settings app.
2. Scroll down and tap Accessibility.
3. Tap Zoom (under the heading Seeing).
4. Set the switch next to Zoom to green to activate it.
5. Double-tap the screen with 3 fingers to zoom out (the screen will then return to normal).

It should work now!
